

Australian Bragg Centre & Targeting Cancer GP Information Evening

About this event

The Australian Bragg Centre for Proton Therapy and Research is currently under construction in Adelaide BioMed City Precinct and is due for completion at the end of 2023. The synchrotron will be assembled at this time, followed by commissioning, with first patient treatment scheduled at the beginning of 2025. This will be the first clinical proton therapy facility in Australia and New Zealand and will provide additional treatment options to patients who would benefit from this type of treatment.

Are you a GP working in Australia?

Do you want to know more about this treatment option available to your patients? Or as a key member of the multidisciplinary team, learn how to support your patients in survivorship who have had proton therapy?

Please join us and hear from some of the team working to bring Proton Therapy to Australia

Thursday, December 1st, 2022

SAHMRI- Auditorium event starting at 5:30pm with refreshments and networking
Online via zoom starting at 6:00pm (ACDT)
